

Double Hello

Exported on: 4/1/2026, 6:42:24 PM

hihi

4/1/2026, 6:42:16 PM

Hello! I'm Ask Newton, your AI assistant. How can I help you today?

4/1/2026, 6:42:16 PM

how caan i know about python

4/1/2026, 6:42:16 PM

You can start with the basics of Python programming, such as data types, variables, loops, and functions. Here's a simple code to get you started:

```
print('Hello, World!')
```

You can also check out online resources like Codecademy, Coursera, or edX for Python courses and tutorials.

want to learn about Python libraries

4/1/2026, 6:42:16 PM

NumPy and Pandas are popular libraries for data analysis and manipulation in Python. NumPy provides support for large, multi-dimensional arrays and matrices, while Pandas provides data structures and functions for efficiently handling structured data, including tabular data such as spreadsheets and SQL tables.

Here's an example of using NumPy to create and manipulate arrays:

```
import numpy as np
```

```
arr = np.array([1, 2, 3, 4, 5])
```

```
print(arr)
```

You can also use Pandas to create and manipulate data frames:

```
import pandas as pd
```

```
df = pd.DataFrame({'Name': ['John', 'Anna', 'Peter'], 'Age': [28, 24, 35]})
```

```
print(df)
```
